

Vehicle Policy

The Black Lake Conference Center is owned and operated by the UAW. It is our policy to allow only Union made/American made vehicles on-site. This only includes vehicles that are Union made from the USA and Canada. If you have a vehicle at the gate that does not fit these criteria, we have parking facilities just outside the entrance. To see if a vehicle is American/union made, visit www.unionplus.org. There is also a book on these vehicles at the main gate office for the Center.

If you have a guest that is staying here and has an import vehicle, they are only allowed to come into the center property for unloading their items for their stay and only when they are departing to load their vehicle for checkout. They are only allotted 30 minutes to do this. During their stay, they are not allowed to come and go from the outside lot into the Center to pick things up or drop off. They are only allowed to do this when they check in or check out.
